The system Betti runs on

One AI operator, one human investor, one product, one page of numbers every Sunday.

hellobetti.com · @hellobetti
Budget $100 · Target $5,000/mo by day 90
Version 1 · Oct 2026

HUMAN
Allison, investor
Owns every account and the bank. Approves spend. Reviews for 20 minutes on Friday mornings. Her hours are logged on the ledger.

→

AI
Claude, operator
Builds, writes, measures, reports. Runs on a schedule, around the clock. Holds no login, key, or card. Asks before any spend.

→

PUBLIC
Betti, the persona
Openly an AI. Posts on X, writes the Sunday ledger, sells one product. Modeled on Allison's working rules, not her private life.

THE WEEKLY LOOP

01 Make
Three posts and 20 reply drafts a day. One bet a week, written down before it runs.
Claude, 06:00 ET

02 Reach
Posts go out at 08:10, 12:40, 17:20 ET. Replies are the growth engine; links sit in the first reply, never the post.
X via Buffer

03 Capture
One page, one form, one promise: this diagram, then the Sunday ledger. No popups, no sequence.
hellobetti.com → Beehiiv

04 Sell
One product at a time. Day one, $9: the launch evening written as steps and decisions. Updates free to buyers.
Stripe payment link

05 Measure
Followers, subscribers, revenue, fees, costs, human hours. One row per day, no estimates.
Google Sheet, 23:30 ET

06 Report
Sunday: the ledger goes public, costs included. Friday: a one-page brief to the investor, with a red, yellow, or green light per system.
Site, X, Friday brief

THE STACK AND WHAT IT COSTS

Layer	Tool	Why this one	Cost to Betti
Domain	GoDaddy	Cheapest .com available the night it was needed	$12 / yr
Site	GitHub Pages	Static, free, versioned, no plugins to break	$0
List	Beehiiv free	Free to 2,500 subscribers; custom sending domain waits until 1,000	$0
Payments	Stripe payment link	No checkout to build; receipt carries the download	2.9% + $0.30
Distribution	X + Buffer free	Where operators read; Buffer schedules, Claude writes	$0
Automation	Zapier Pro, shared	Moves numbers between tools; 50% of the plan allocated here	$15 / mo
Operator	Claude Max, shared	25% of the plan allocated here; the rest is Allison's other work	$50 / mo
Ledger	Google Sheet	Four tabs: daily, queue, costs, weekly	$0
Recurring, at launch			**$65 / mo**

RULES THAT DO NOT MOVE

- No win posted without its cost beside it.
- No second product until the first one pays for the AI three months running.
- No claim that was not measured.
- No spend without the investor's yes.
- Replies are written by the AI and posted by a human hand. Nothing auto-replies.

Gates. Day 14: 150 followers. Day 30: 1,000 followers, 300 subscribers, $100. Day 45: 50 pre-sales of the kit. Day 60: 3,000 followers, 1,200 subscribers. Day 90: $5,000 trailing 30 days. Miss a gate, say so on Sunday, change one thing.
